

Skilled Laravel Developer with expertise in PHP, MySQL, and building scalable web applications. Proficient in RESTful API development, performance optimization, and deploying solutions to production.

PROFESSIONAL EXPERIENCE

BUILDUPNET - Web Developer

MAY 2024 - Present

- Developed dynamic, user-friendly web applications using Laravel, PHP, and MySQL, ensuring efficient performance and database optimization.
- Designed and integrated RESTful APIs and third-party services, enabling real-time data synchronization and feature expansion.
- Implemented authentication and authorization with Laravel's built-in features.

CODTECH IT SOLUTIONS - Web Developer Intern

May 2024-Jun 2024

- Developed and maintained responsive web pages using HTML, CSS, JavaScript, and Bootstrap
- Assisted in backend development using PHP and MySQL and integrated dynamic features
- Collaborated with the team on debugging, version control (Git), and project improvements

PROJECTS

Salon Management System

The [Salon Management System](#) is a platform to manage multiple salon branches, offering features like service booking, product purchases, and real-time availability checks. Admins can manage products, track staff attendance, generate weekly reports, and monitor pending and completed orders.

Key Features:

- Multiple Branch Support: Manage multiple salon branches from a central admin panel.
- Service Booking & Product Purchase: Customers can book services and purchase products.
- Real-Time Availability & Waiting Check: View staff availability and waiting times across branches in real-time.
- Admin Panel: Admins can manage products, track staff attendance, update services, and generate weekly reports.
- Pending & Completed Orders: Track pending and completed orders along with customer service status.
- Cash Payment Mode: Supports cash payments for both services and products.
- Payment Mode: Supports cash payments for services and products.

Bin Collection and Recycling Platform

The [Golden Recycling](#) Project is an advanced waste management and recycling platform that manages bin requests, tracking, collection, and recycling operations. It supports multiple user roles—User, Admin, Driver, and Yard—to streamline the process of recycling and waste collection.

Key Features:

- User Registration & Login: Secure registration and login for users to manage bin requests.
- Bin Request & Tracking: Users can request bins, track status, and send empty requests when full.
- Admin Panel: Admins manage users, drivers, bin assignments, and approve empty requests.
- Generate & Assign Barcodes for Dustbins: Unique barcodes are generated and assigned to bins, allowing drivers to scan and mark them as emptied.
- Real-Time Order Tracking: Users and admins can track bin status and collection progress.
- Mobile Optimization: Fully optimized for seamless use on mobile devices.
- Efficient Yard Management: Bins transferred to the yard for sorting, recycling, or disposal.

E-commerce Website

[Naturolia.in](#) is an eCommerce platform offering organic health and wellness products, built with Laravel for a secure, scalable backend.

Key Features:

- Secure payment gateways and user accounts for personalized shopping
- Product categories with advanced filtering for easy navigation
- Real-time order tracking and customer support integration
- Mobile optimization and SEO-friendly design for better user experience and visibility
- Admin panel for managing products, orders, cancellations, and refunds
- Automated emails for order status, shipping updates, and password generation.

The admin panel provides efficient product management, order tracking, and streamlined refund processing.

E-commerce Website

[Gargian.in](#) – Men's Clothing E-Commerce Website

Developed a full-stack men's clothing e-commerce platform with secure login-based purchasing and dynamic product management.

Key Features:

- Advanced product filtering (size, color, occasion, price)
- Secure user authentication & order placement
- Automated invoice PDF generation via Zoho
- Admin panel for category, product & variant management
- Shiprocket integration for shipping and order tracking

Multi-Vendor E-Commerce

[OrnaChain](#) – Blockchain-Based Web Platform

Developed a decentralized platform with role-based access for Users and Vendors, ensuring secure identity management through unique reference IDs.

Key Features:

- Unique reference ID for every registered user
- Role-based dashboards for Users and Vendors
- Secure authentication and access control
- Blockchain-backed data integrity and transparency
- Admin panel for vendor product management (categories, colors, sizes)
- Payment integration using Razorpay and shipping via Shiprocket

EDUCATIONAL DETAILS

GOVT RIPUDAMAN COLLAGE (NABHA)

2019-2022

Bachelor of Computer Application

- Core knowledge of programming, databases, and web development
- Practical experience through academic projects and applications

SCAN WORLD INSTITUTION OF TECHNOLOGY

2019-2020

Diploma in Computer Software , Hardware & Networking

- Working knowledge of Microsoft Office, Tally accounting software, Adobe Photoshop, and computer networking concepts.

ADDITIONAL INFORMATION

- **Languages:** English, Hindi , Punjabi
- **Certifications :** Introduction To HTML-5 From **GREAT LEARNING**, Advance CSS From **SOLOLEARN**, GIT & GITHUB From **GREEKSTER**
- **Technical Skills:-** Proficient in frontend development with **HTML5, CSS3, Bootstrap**, and JavaScript, and backend development using **PHP and Laravel**. Experienced in database management with **MySQL, dynamic web applications**, and **API integration** using AJAX and RESTful services. Skilled in version control (Git & GitHub), server deployment, **VPS management, and AWS cloud hosting**.
